

I am a concerned listener of Air1 radio which uses an FM Translator. I understand the benefits of modern technology and its cost effectiveness at times. However, the priority of LPFM over FM Translators is unjust. I understand that the supporters of LPFM do not see value in radio stations such as Air 1. That is because they see the value of money over people. You can not put a price tag on people, they are priceless. The songs Air one plays may just be songs to them but they are life to me and my family. We listen to nothing else. It is hard to make decisions that go against society and for what is morally correct but I will be praying that this is what you will do.
